Introduction

Many thanks to the committee for the invitation to judge this year's show. I would like to say well done on finding this roomy venue, under these trying times. My heartfelt thanks also for the warm tribute to my late sister, Veronica, printed in the catalogue.

DOGS

MPD

1st Keenan & Griffin's Duxsara Double Diamond.

Dark b/w

8 months old.

He has a clean head with well-shaped eyes His muzzle matches his skull which is lean. Wide mouth and evident chin. He has height of foreleg. His topline slopes into angulated quarters with short hocks. He is at the rangy stage at the moment. He is a free and spirited mover

2nd Lowery's Danlow Magic Bullet

R/W just over 6 months, so a real baby with a nice shape of head. He has dark well shaped eyes and the muzzle to skull ratio is good. He, also, has a wide mouth and chin. Sound in front with strong pasterns. His body presents a balanced square with a sound backend. He has a happy temperament.

However, the 1st placed dog was more collected on the move

PD

1st Fay Smiths Lorrosa Relight my Fire

10-month-old B/W. This puppy has a shapely head with a well-padded muzzle. He has a wide mouth and the eyes are dark and of the correct shape. His smooth neck runs into a short back. His front is true and he is tall on the foreleg with good feet. He is sound throughout his body; his quarters are strong with short hocks. He moved with a clean forward reach, driving well from behind.

BPD and Res.BPIS

2nd Lafferty's Greenawell Lorenzo

11-month B/W

He is a smart boy with an appealing head with well-shaped dark eyes; good mouth and chin and correct ear carriage. True front and a neck flowing into a square body, with a sloping topline. He moved well, but I thought, the 1st dog has a more powerful hind action.

3rd Woolliss and Flintoff Boxania Roamin' Around at Rameleon

Junior Dog

1st Brough & Cairns: Galicar Inawrap with Limubox

Dark B/W dog coming up to 13 months Pleasing head with a chunky muzzle which is well-off for padding. The mouth could be a little wider but is functional. He has a great expression, set off by a kind eye. Square compact body, which is well balanced, both ends. He drives from behind with a ground covering stride.

2nd Mullis: Idleforde Let's Do It

13-month-old, dark B/W. He has an eye-catching outline, his head is appealing, with dark eyes, bright expression. Plenty of chin and the mouth is wide. Tall on the foreleg. He is young so needs to drop into his brisket. He held his topline on the move. He has a good tail set and is well angulated behind. He is a little untidy coming towards you, but moved with power behind.

3rd Welch's: Treju Love Ya Millions.

Yearling Dog

1st Beardsell & Van Beck's: Newlaithe Supernatural

13 months old. Dark brindle and white. Basic head shape with correct eye set, which are dark. I would like a little more filling under the eyes. Wide mouth. In body he is a joy to go over. Neck flows into a very sound front, with elbows flush to chest. Sound bone down to his tight feet. He has a lovely spring of rib, back short and strong, tail set just right. His body is well muscled, with plenty of cover; just the right amount of angulation to the rear. Short hocks. With all his body parts fitting so well, this gives him effortless movement. Very sound and showed very well, and thus made my final cut.

2nd Fox's Britesparke Norman Moon

19-month-old golden B/W, with a lovely lean head with a pleasing expression. Good mouth, pleasing picture when stacked. He has plenty of neck leading into well placed shoulders. He moved with purpose but slightly lost his topline on the move.

Novice Dog

1st Payne's Willow Storm Chaser

Dark b/w 11 months. He is well off for bone and substance. He has a balanced head with well-placed eyes, which are dark. His mouth is okay with a good chin. Square outline when posed. Clean front with elbows flush to chest. He held his topline on the move. He could do with less angulation behind. He was well handled.

2nd Lott's Britesparke Argon Moonbug

18 months old G/B/W, has a pleasing expression with his dark eyes and correct mouth and chin. His muzzle is well padded and his body angles front and rear are well balanced. He moved cleanly around the ring. He just needs a little more confidence. Smaller mould than the 1st.

She has a lively expression and kind eye on this girl. Muzzle has width and depth, and is well padded. Elegant neck, into a sound front. Short back with a correct tail set. The rear end is well muscled, with just the right amount of turn of stifle. Short hocks which she really drives off. I was drawn in by her balanced outline which is equalled by her underline.
